PROFILE

Computer Science Engineering student who learns by building practical software. Interested in AI, computer vision, web development, automation and user-focused products. I enjoy taking ideas from rough concepts to working prototypes, then improving usability, debugging issues, and publishing projects so they can be demonstrated and evaluated.

EDUCATION

B.Tech — Computer Science Engineering TKR College of Engineering and Technology	2024 – Present
Intermediate Sri Chaitanya Junior College	91.2% • 2022 – 2024
SSC DR.KKR's Gowtham E.M School	524 marks • 2016 – 2022

TECHNICAL SKILLS

Programming	Python, Java, JavaScript, C
Web & UI	HTML5, CSS3, React, Vite, Tailwind CSS, Responsive Web Design
Backend	Flask, Node.js, Firebase, Firestore
AI / Computer Vision	Computer Vision, OpenCV, DeepFace, OCR, AI/ML concepts
Databases	MongoDB, SQL, Firestore
Automation	Python automation, Playwright, browser automation, Excel/Google Sheets workflows
Tools	Git, GitHub, VS Code, Capacitor

SELECTED PROJECTS

Evenciaga — Volunteer Management Platform

Stack: React, Vite, Tailwind CSS, Firebase/Firestore, Express, Capacitor

Built a full-stack platform for event organizers to manage events, volunteers, attendance, notifications and operational workflows. Worked through responsive UI, authentication/data flows, deployment and Android packaging with Capacitor.

Repository: <https://github.com/Karthik-978/Evenciaga>

CarbonLensAI — Environmental AI Web Application

Stack: Python, Flask, Computer Vision, OCR

Developed a food-image based carbon-footprint project connecting image analysis, food classification and environmental impact estimation through a Python/Flask workflow, including OCR-related processing.

Repository: <https://github.com/Karthik-978/Carbon-Lens-Ai>

Hand Controller — Hands-Free Computer Interaction

Stack: Python, Webcam, Computer Vision

Created a webcam-based hands-free computer controller using hand gestures for cursor movement, clicking, scrolling and basic computer actions.

Repository: <https://github.com/Karthik-978/Hand-Controller>

Eye Controller — Gaze-Based Computer Interaction

Stack: Python, Webcam, Eye Tracking

Created a webcam-based eye-tracking controller for hands-free computer interaction using gaze and eye-movement concepts.

Repository: <https://github.com/Karthik-978/Eye-controller>

Vistera — Hackathon Website Improvements

Stack: React, HTML, CSS, JavaScript, GitHub

Improved a hackathon website with stronger visual hierarchy, responsive layouts, sponsor visibility, prize-pool presentation, registration flow and event sections.

Nova AI — AI Chatbot Prototype

Stack: Python, Flask, HTML, CSS, JavaScript, DeepFace

Developed an AI-oriented web application prototype involving API integration, Flask routes, web templates, static assets and computer-vision functionality.

Automation Workflows

Stack: Python, Playwright, Excel, Google Forms/Sheets

Built automation workflows for spreadsheet processing, browser navigation, form handling, repetitive data entry and document-oriented tasks.

EXPERIENCE, LEADERSHIP & ACTIVITIES

GeeksforGeeks — Campus Mantri

Selected as a Campus Mantri and supported technical learning, student outreach, program promotion and community engagement. Worked on awareness campaigns and student-facing opportunities, and completed the MongoDB learning initiative.

Student Tribe — Active Tribe Ambassador

Supported student communication, networking, community activities and sharing of learning and career opportunities.

IEEE Summer of Code 2026

Participated in the technical program organized by the IEEE Student Branch, Graphic Era Hill University, focused on hands-on learning and problem solving.

Mikkilneni Ravi Prakash Memorial Hackathon

Worked on CarbonLensAI for the assigned problem statement, connecting food image understanding with environmental impact estimation.

CERTIFICATIONS & LEARNING

- Building RAG Apps Using MongoDB — MongoDB, issued July 2026.
- Building AI-Powered Search with MongoDB Vector Search — MongoDB, issued July 2026.
- Introduction to Generative AI — certificate dated 6 April 2026.
- Generative AI certificate — Simplilearn.
- GenAI Data Analytics — Forage by Tata.
- TestMu AI Certification.
- MongoDB Learning Program — completed all 6 modules, earned all 6 badges and received the completion certificate.

ACHIEVEMENTS & HIGHLIGHTS

- Built and published public projects spanning full-stack development, AI, computer vision and automation.
- Selected as a GeeksforGeeks Campus Mantri.
- Completed the MongoDB learning program with 6 modules and 6 badges.
- Participated in IEEE Summer of Code 2026.
- Worked on CarbonLensAI for the Mikkilneni Ravi Prakash Memorial Hackathon.
